Professional Summary

Data Analyst and Python Developer specialized in transforming complex data into actionable insights that support decision-making. Extensive experience in building machine learning models and developing interactive web applications, with a proven track record in financial data analysis and automating resume screening according to applicant tracking systems. Skilled in data analysis, performance optimization, and delivering innovative technical solutions in fast-paced and dynamic environments.

Education

Bachelor's Degree in Management Information Systems - Al-Obour High Institute for Management & Informatics

Graduation Year: 2024 - Grade: Very Good | | Graduation Project Grade: Excellent

Graduation Project: Electronic system for hotel and international flight reservations

Projects

AI Resume Analyzer Pro

- Developed a smart tool in Python to analyze PDF resumes and automatically extract key information.
- Applied natural language processing techniques to identify keywords and improve analysis accuracy.
- Designed an algorithm to calculate resume compatibility with applicant tracking systems.
- Optimized processing speed and enhanced user experience with an interactive interface.

Smart Savings Planner

- Built an interactive financial dashboard using Streamlit and Plotly.
- Performed in-depth analysis of income and expenses to generate accurate savings forecasts.
- Developed dynamic visualizations to support informed financial decision-making.
- Enhanced user experience with a clear and responsive interface.

Madrid Real Estate Predictor

- Created a machine learning model to predict property prices based on historical data.
- Conducted data cleaning, exploratory analysis, and feature selection.
- Evaluated model performance and improved prediction accuracy using advanced algorithms.
- Documented all steps to ensure scalability and reusability.

Soft Skills

Effective Communication | Analytical Thinking | Problem Solving | Project Management | Teamwork | Time Management | Attention to Detail

Hard Skills

Python | SQL | Excel | Machine Learning | Data Analysis | Streamlit | Pandas | NumPy | Scikit-learn | Plotly | Power BI | Exploratory Data Analysis (EDA) | Statistical Analysis | Data Visualization | PyPDF2 | Git | GitHub
